The present publication, judging by th number now before us, is intended occupy a position, as regards China and the neighbouring countries, some what simils to that which has been filled in India by th Calcutta Review. The great degree of a tention that has been bestowed of late year upon the investigation of Chinese literature antiquities, and social developments, to say nothing of linguistic studies, has led to the accuraulation of important stores of information, rendering some such channel of publicity as is now provided extremely desirable; and contributions of much interest may fairly be looked or from the members of the foreign consular services, the Chinese Customs corps, and the missionary body. among whom a high degree of Chinese scholarship is now assiduously cultivated. and who are severally represented in the first number of the Review by papers highly creditable to their respective authors Some translations from Chinese novels and plays are marked by both accuracy and freshness of style; and an account of the career of the Chinese poet-statesman of the eleventh century, Su Tang-p'o, by Mr. E. C. Bowrs, is not only historically valuable, but is also distinguished by its literary grace. Beside notices of new books relating to China and the East, which will be a useful feature of the Revisio, if carried out with punctuality and detail, we are glad to notice that Notes and Queries are destined to find a place in its pages also. It is to be hoped that this opening for contributions on Chinese subjects may evoke a similar degree of literary zend to that which was displayed during the lifetime of its predecessor in the field, and that the Chma Review
